<b>Office Action Summary</b>	<b>Application No.</b> 10/664,682	<b>Applicant(s)</b> KAIZUKA, KAZUTOSHI	
	<b>Examiner</b> Todd E. Manahan	<b>Art Unit</b> 3732	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Oath/Declaration***

The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because:  
It does not identify the city and either state or foreign country of residence of each inventor. The residence information may be provided on either an application data sheet or supplemental oath or declaration.

### ***Specification***

The application is objected to because of alterations which have not been initialed and/or dated as is required by 37 CFR 1.52(c). A properly executed oath or declaration which complies with 37 CFR 1.67(a) and identifies the application by application number and filing date is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3, 8 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 3 is redundant of the subject matter of base claim 1, line 1.

Claim 8, line 6, it is unclear what constitutes “an internal mounted within said cylindrical body”.

*Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-9 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Japanese Patent No. 3045250.

Japanese Patent No. 3045250 discloses a hair curler A having an internal heater 3. The curler is “formed in tubed”, i.e. cylindrical and made of a heat resistant resin mixed with crushed pearlite (see para. 006-007). The crushed pearlite contains a silicon dioxide and alumina, ferrite, and magnesia (far infrared emitting powders) (see table 1). Projections extend from the cylindrical body (see para. 006). A thermolabel is disposed on the cylinder to indicate the temperature of the curler (see para. 0011). The heat resistant resin is a polyester elastomer (see para. 007). The heat resistant resin is admixed with about 1-3% pearlite powder (see para. 009).

Claims 1-3 and 6-8 are rejected under 35 U.S.C. 102(e) as being anticipated by Wong et al. (United States Patent No. 6,81,928).

Wong et al. disclose a hair curler having an internal heater (see figures 6A, 6B and col. 5, lines 21-41). The curler is cylindrical and made of a heat resistant resin mixed with a multi-element mineral powder containing a silicon dioxide and aluminum oxide, iron

oxide, titanium oxide, and magnesium oxide (far infrared emitting powders) (see col. 3, lines 11-29). The heat resistant resin is admixed with about 3-5% multi-element mineral powder (see col. 3, lines 54-61).

### ***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Todd E. Manahan whose telephone number is 571 272-4713. The examiner can normally be reached on Mon-Fri.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kevin Shaver can be reached on 571 273-4720. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
